

2 March 1988

John,

Attached is a copy of an article which came to our attention in the Government Computer News of 19 February 1988. This is a specialized newspaper devoted to government computer applications etc. It concerns a bill introduced by Phil Crane apparently entitled 'Truth In Government Accounting Act of 1987'.

This type of legislation appears on the horizon every once in a while and usually founders primarily because of inability to enforce its provisions on a government-wide basis.

We are interested in keeping an eye on this bill.
